

Training resources for your researchers

You want your researchers to understand how to get the information they need from SpringerMaterials. And we're keen to help, which is why we offer various training resources to help familiarise them with the platform.

Webinars

During the course of the year we run a number of training webinars, hosted by our specialist Product Managers.

Visit springernature.com/sm-webinars for more details.

In addition to this, we are also able to offer bespoke webinars for individual institutions. If you wish to offer your researchers a more tailored service, please contact us at springermaterials@springernature.com.

We'd be happy to discuss your requirements and organise suitable training.

In-person training

We can also come to your premises to train your researchers face-to-face. This is useful as it allows us to immediately answer any questions your researchers may have. This is the most personal experience of all our training resources.

To find out more or to arrange a session, please contact us at springermaterials@springernature.com.

Online tutorials

Visit springernature.com/sm-tutorials and you'll find links to a host of tutorials on a range of topics. Direct your researchers towards these and they'll quickly learn how to get the most out of SpringerMaterials.
