

Ardent

a system in a terminal

The new ARDENT 15 provides a complete system capability including a 16 bit mini, 4 ports for additional CRTs, parallel printer port, choice of disc controllers (yours or ours) compatible with any SMD/CMD or cartridge drive, and a 15" pcb slot for your use to add interfaces for magnetic tape, cache memory or any other device you choose.

The ARDENT 15 with 64KB or 128KB is software compatible with IRIS, BITS, IOS, BLIS/COBOL and a host of other operating systems.

The flexible ARDENT 15 CRT enables emulation of the major CRT suppliers and also provides as standard ergonomic features a low profile DIN keyboard, tilt/swivel, selectable phosphors, all available with matching cost effective add-on ARDENT-CRTs to complete your integrated system.

PROCESSOR	CPU Memory Speed	16 BIT with virtual console 64 or 128KB 400 ns cycle time
INTERFACES	Communication Printer Multiplexor Disk Other	RS232, 8 Baud rates from 110 to 19,200 Parallel Centronics compatible to 600LPM 4 serial ports with clear to send Controllers for SMD, CMD, LARK, Western Dynex, Diablo, Pertec, Ampex Standard Backplane, Real Time Clock
SOFTWARE COMPATIBILITY	Operating System	IRIS, BITS, BLIS/COBOL, IOS
DISPLAY	CRT Format Character Set Video Attributes Tilt Rotate Keyboard	Non glare screen, P4 white (standard), green phosphor optional 80 characters/line, 24 lines Full ASCII (upper & lower case) Protect, Blink, Reverse, Dual Intensity 15° up, 7° down 90° low profile (DIN), detachable, numeric pad
OPTIONS		Cache Memory, CRT emulation packages, Tape Controller, Additional CRT ports, Look-alike add-on CRTs, Communications
GENERAL	Power Weight	110 VAC @ 2A 60 Hz 220 VAC @ 1A 50 Hz 75 lbs. approx.
