Brepols Online Databases
The reference bibliography for academic publications relating to Ancient Greek and Roman Civilization

L’Année philologique, published by the Société Internationale de Bibliographie Classique, is a specialized bibliographic database of scholarly works relating to all aspects of Ancient Greek and Roman civilizations. The bibliography is published in print and online. The online database includes all volumes of the annual index, beginning with Volume I published in 1928. Both the online and print publications will now be available via Brepols Publishers.

Broad coverage on a variety of subject areas

L’Année philologique covers a wide array of subjects, including Greek and Latin literature and linguistics—which includes early Christian texts and patristics—Greek and Roman history, art, archaeology, philosophy, religion, mythology, music, science, and scholarly subspecialties such as numismatics, papyrology, and epigraphy. Abstracts of journal articles are provided in English, German, Spanish, French, or Italian. Book entries may include tables of contents and book review information.

An international bibliography

L’Année philologique is international in character; not only in terms of the origins of the publications it indexes, but also in terms of its production, with teams from France, Germany, Italy, Spain, Switzerland, and the United States collaborating together to keep the database up-to-date.

Brepols Publishers has been developing databases in the field of humanities for more than 25 years. Now, through the addition of L’Année Philologique, 6 bibliographic databases are available on BREPOLIS, providing access to over 2,890,000 records.

Together, L’Année philologique (covering Antiquity), the International Medieval Bibliography and the Bibliographie de civilisation médiévale (covering the Middle Ages), and the International Bibliography of Humanism and the Renaissance (covering Early Modern History) cover more than 3,000 years of human history, encompassing Minoan civilization up to the reign of Louis XIV.

Alongside this chronological approach, BREPOLIS also provides access to thematic bibliographic databases: the Index Religiosus, dedicated to Theology, Religious Studies, and Church History; and the Bibliography of British and Irish History, dedicated to the history of the British Isles.
The email alert application allows you to save search queries and notifies you when updates or new records are available. The metrics component enables users to examine in detail trends in Classics, see journal profiles (e.g., information on subjects and periods covered), and find authors' publication profiles.

The Library of Latin Texts is the world's leading database for Latin texts. It contains texts from the earliest Latin literature (Livius Andronicus, 240 BC) up to the texts of the Second Vatican Council (1962-1965). It covers all the works from the classical period, the most important patristic works, a very extensive corpus of Medieval Latin literature, and works of recentior latinitas. At present, more than 4,700 Latin texts are available.
